

# Action Item 001018-05A

**ILOLANT requested SEA 04L23 to investigate and research Technical Manual backorder and research Backorders:**

**difference between ILO records and Navy Logistics Library (NLL):**

- October 2002 - Total Line Items 3,021
- January 2003 - Total Line Items 2,642

- **Non-stocked TMs:**

October 2002 - Total Non-stocked TMs 6,000

January 2003 - Total Non-stocked TMs 4,773

- **Status of the 4,773:**

765 TMs in digital media and are being loaded to TMPODS

2,950 TM copies in NETL and being processed for TMPODS

1,058 TM copies being requested from TMMAs

**NSDSA has established a process to minimize the future reoccurrence of non-stocked TMs**

# Action Item 001018-5

**It was requested that SEA 04L23 provide feedback on ILS Certification on requirements, i.e., digital versus paper.**

- “COMNAVSEA, ISEA/TMMA, and TYCOM representatives jointly determine TM-outfitting requirements based on specific system user needs, usage requirements, weight and available stowage, and the ability to restore from an engineering or battle casualty. Ships are not authorized to exceed or reduce these requirements unless specifically authorized by the TYCOM in their Command Chain”

# Naval Systems Data Support Activity (NSDSA)

## Managing NAVSEA's and SPAWAR's Technical Documentation

Presentation for Fleet Logistics Support Improvement Conference  
4 March, 2003

# Mission

- Implement and manage NAVSEA and SPAWAR Technical Manual Management Programs (TMMP).
- Provide fleet support for Technical Manual problems.
- Manage and maintain the Technical Data Management Information System (TDMIS).

# Services to the Fleet

- Indexes of Technical Publications (ITP)
- TMDER Management
- Technical manual Analysis Report (TMAR)
- Web TDMIS
  - All available via NSDSA Web Site:  
<http://nsdsa.phdnswc.navy.mil>
- GPETE and NSTM CDROMs
- Tailored hull unique ATIS raster CDROMs

## Search Reference Documents

## NSDSA PORTAL

WELCOME TO THE NAVAL SYSTEMS DATA SUPPORT ACTIVITY:

THE NAVSEA AND SPAWAR CENTER OF EXCELLENCE FOR  
TECHNICAL MANUAL INFRASTRUCTURE/SUPPORT

*Coming April 22 - 24: The Spring 2003 TMMA Conference. [See details...](#)*

NSDSA is the NAVSEA and SPAWAR designated field activity responsible for the centralized management of technical manuals and technical services support of the NAVSEA Technical Manual Management Program.

TMMP is the foundation to NSDSA's products and services. It serves as a focused

collection of policies and procedures on which all technical manual activities are based. NSDSA TMMP products and services

TDMIS is the TM life-cycle tracking system maintained by NSDSA and used worldwide. Access to TDMIS provides NAVSEA, SPAWAR and NAVAIR with complete TM management functionalities. TDMIS products and services include:

## NSDSA Products

[View TMDER Metrics.](#)

NSDSA supports the TMMP processes that drive TM life cycle management.

A TMDER is used to identify technical and non-technical discrepancies or deficiencies in NAVSEA or SPAWAR TMs.

A TMCR is a definitive, contractual document that tailors all specs, standards, or data items to produce a specific

**TMMP** is the foundation to NSDSA's products and services. It serves as a focused

Technical Data Management Information System (TDMIS)

What is TDMIS?

A Technical Data Management Information System (TDMIS) is a Department of the Navy (DON) database used to manage and track the life-cycle history of technical manuals (TMs). TDMIS currently contains technical manuals from Naval Sea Systems Command (NAVSEASYSKOM), Space and Naval Warfare Systems Command (SPAWARSYSKOM) and Naval Air Systems Command (NAVAIRSYSKOM) Air Traffic Control and Landing System (ATC&LS).

How Does TDMIS Help Manage Technical Manuals?

This database contains both the current change and/ or revision configuration information and historical information for each technical manual. Other TM information contained in the database include the distribution list, equipment/ APL applicability, individual hull applicability and supersedure history.

Who Developed TDMIS?

TDMIS is sponsored by DON NAVSEASYSKOM Code 04L and SPAWAR Code 05L. TDMIS software is developed by the Spawar System Center Charleston (SSCC) at Jacksonville Florida. This replaced the Enhanced Ships Technical Publications System (ESTEPS) and incorporated the Logistics Technical Data Module (LTD module).

## TDMIS Web Application

### Technical Data Management Information System Web Application

#### How Do I Access TDMIS for the Web?

**TDMIS Web is now released!** You only need one Username/Password to access either TDMIS Web or TDMIS Client Server. If you currently have access to TDMIS via client server and have not provided your IP address - you will need to do so before you can access the site. Provide your firewall IP address or Dynamic Host Configuration Protocol (DHCP) address to the TDMIS Help Desk.

#### What is in TDMIS Web?

TDMIS Web is a daily extract of the TDMIS Client/Server database. The data is extracted at 1600 hours Eastern Time and electronically transmitted to the TDMIS Web database. At 0130 hours the data is loaded into the TDMIS Web database. The process takes approximately one hour and forty-five minutes to complete. The database will be offline and unavailable for research during this time.

Currently, TDMIS Web users will view data from the following areas:

- Publication Data
- Change Data
- Deficiency Data
- Equipment Data
- Publication Remarks
- Change Remarks
- CD ROM Data

# Department of the Navy Technical Data Management Information System For Official Use Only

Department of the Navy Automated Information Systems and related equipment are intended for the communication, transmission, processing and storage of U.S. Government information. These systems and equipment are subject to monitoring to ensure proper functioning, to protect against improper or unauthorized use or access, and to verify the presence or performance of applicable security features or procedures, and for other like purposes. Such monitoring may result in the acquisition, recording, and analysis of all data being communicated, transmitted, processed or stored in this system by a user. If monitoring reveals evidence of possible criminal activity, such evidence may be provided to law enforcement personnel. Use of this system constitutes consent to such monitoring.

This screen will allow you to view data for a given TMMA. You may select to view either Publication data or Deficiency data. The results of this screen will be returned in a list box that will allow you then to see the details of the individual publications/deficiency data. Resulting screens can be printed using the print feature of your browser.

Click down this box to select your search by activity abbreviation or UIC

UIC

Your selection is by Activity Abbreviation and more than one activity meets your criteria, you will be provided a list of activities to choose from. However, all of the activities listed may not have related publication or deficiency data. Please be aware that once you get to subsequent lists, you may get a message that no data meets your criteria. If this happens use your back button on your browser to narrow down your search or make another selection.

65540

And

You can view either Publication data or Deficiency data for a given TMMA. Please make your selection from the following.

Select Publication or Deficiency data

Publications

Please select to view either active data or all data for a given TMMA. Active data for Publication data would be all pubs that have a status of FI, PI, FV or PV. Active Deficiency data would be Deficiencies with an open status. Open statuses for Deficiencies include, TMDERs in evaluation, Delinquent Tmders, ACN scheduled not yet issued, Non-safety, Review onhold, Submarine ACN, Change/Revision scheduled, Change required - Unfunded, ACN issued, and Low Impact Tmders.

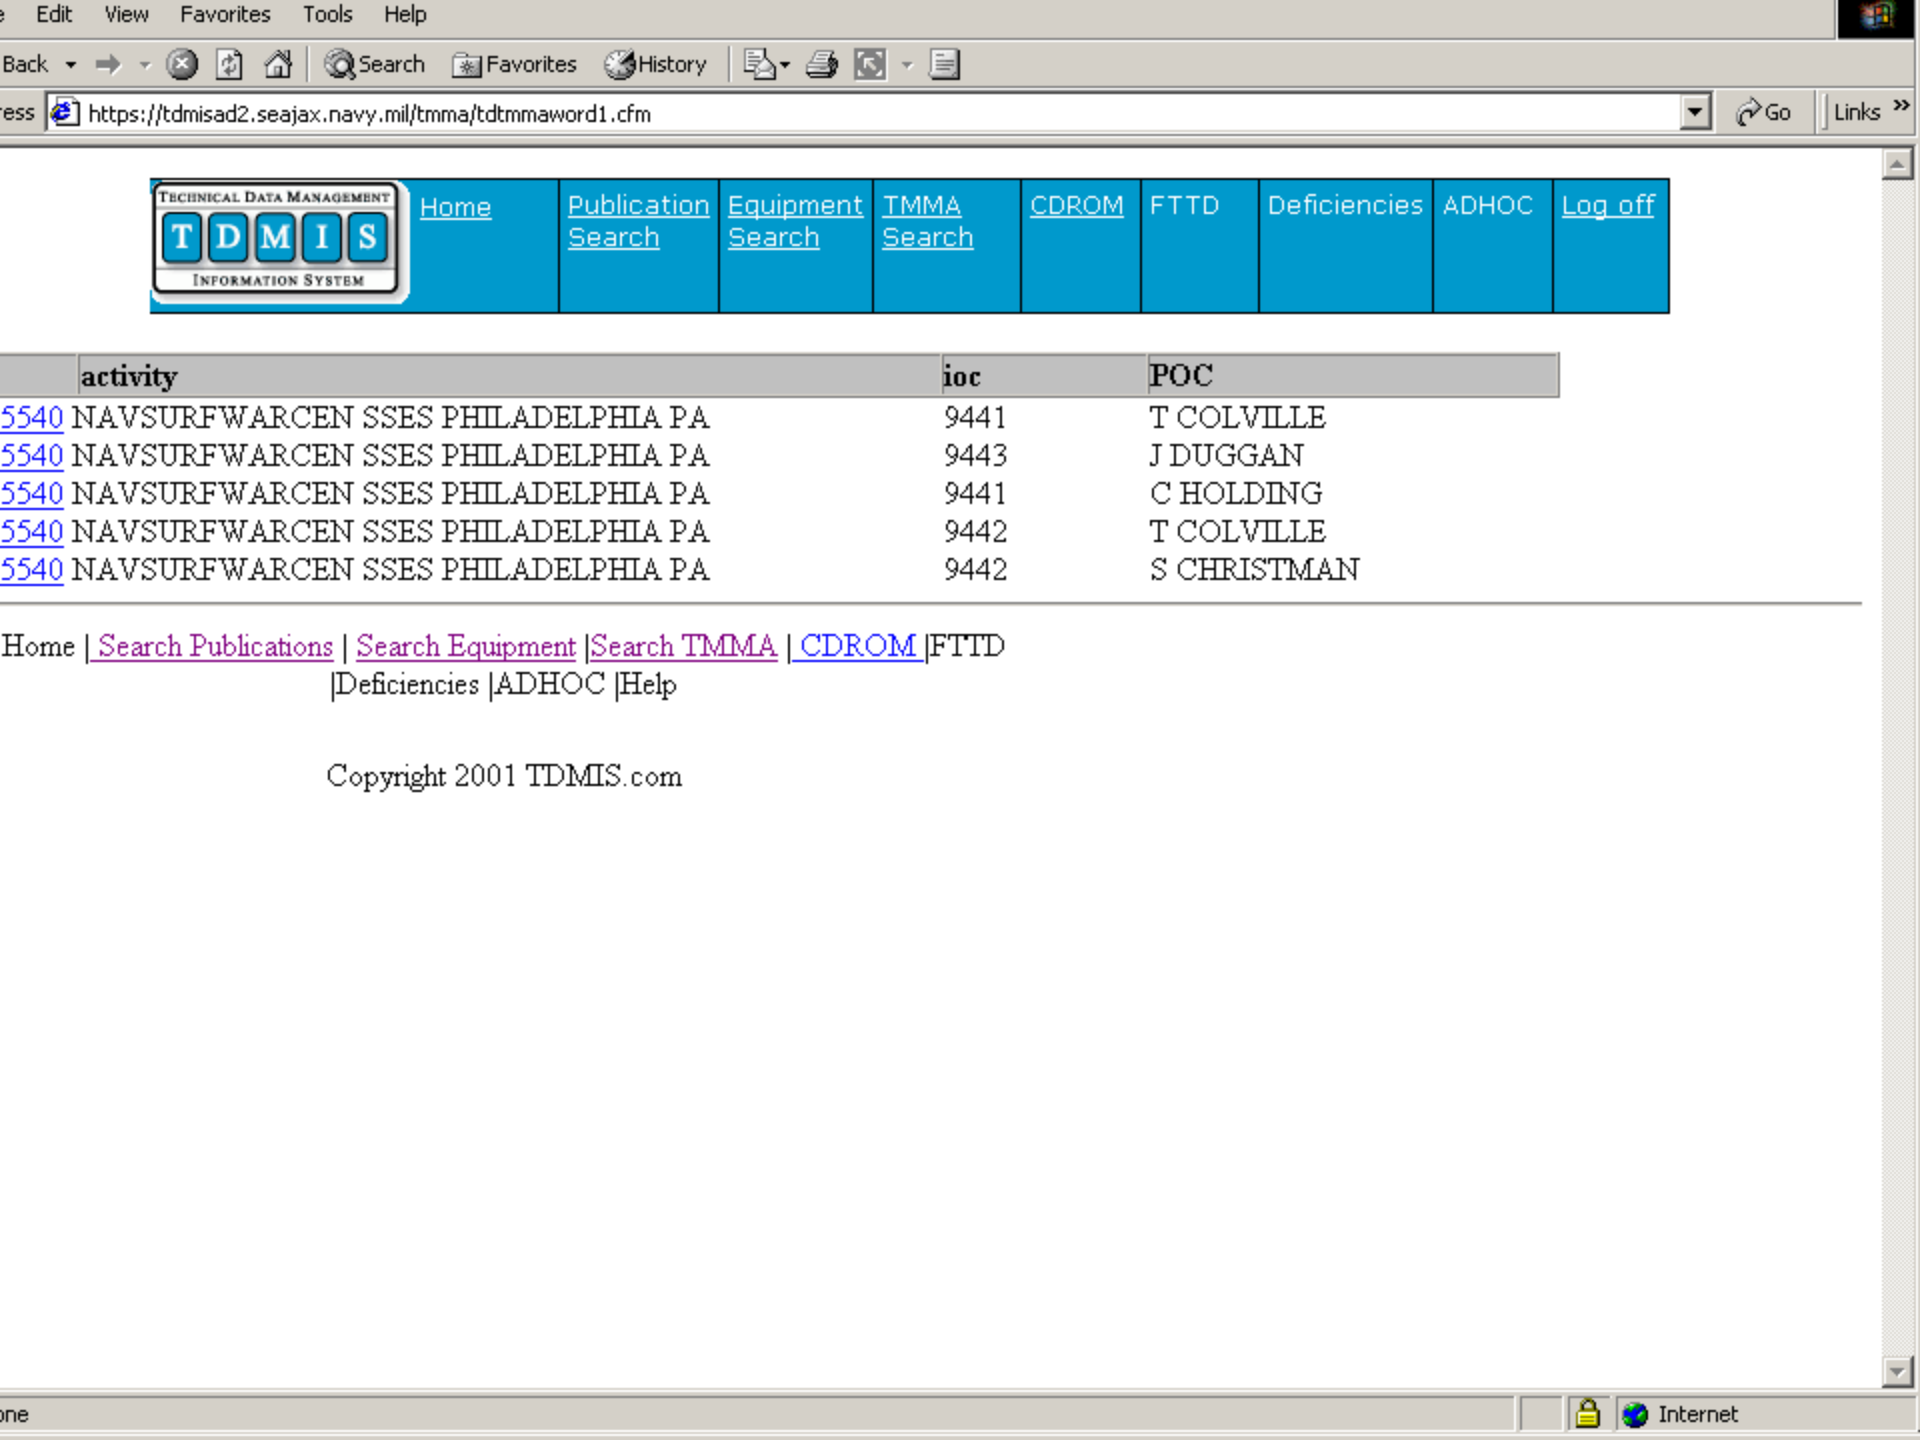

Select whether you want active or all data

TECHNICAL MANUAL

T M M P

MANAGEMENT PROGRAM

**TMMP** is the foundation to NSDSA's products and services. It serves as a focused collection of policies and procedures on which all technical manual activities are based. NSDSA TMMP products and services include:

- **NAVSEA/SPAWAR TMMP Operations and Life Cycle Support Procedures**
- **TM Life Cycle Training**
- **Reference documents and forms**

[Go to TMMP](#)

TECHNICAL DATA MANAGEMENT

T D M I S

INFORMATION SYSTEM

**TDMIS** is the TM life-cycle tracking system maintained by NSDSA and used worldwide. Access to TDMIS provides NAVSEA, SPAWAR and NAVAIR with complete TM management functionalities. TDMIS products and services include:

- **User Registration and Software Download**
- **User Training**
- **User Support**

[Go to TDMIS](#)

**SMART-T** is an intuitive, web-based application that streamlines the logistics acquisition process. Specifically, the system is designed to generate acquisition requirements documents tailored to the user's specific needs in a fraction of the time legacy processes once took.

**SMART-T** is currently under development by the Naval Systems Data Support Activity (NSDSA) under direction of NAVSEA 04L. SMART-T processes include:

- **Indexing specifications and requirements into "piece**

**M-SPECS** is NSDSA's web-based system for producing a tailored Technical Manual Contract Requirements (TMCR) used in procuring technical manuals for the fleet. M-SPECS TMCRs are tailored to the specific level, purpose, and end use requirements for optimum cost-effective acquisition and follow-on maintenance of technical manuals. M-SPECS products and services include:

- **Tailored TMCR produced in real time.**
- **TMCR Repository with TMCRs**

**identify technical and non-technical discrepancies or deficiencies in NAVSEA or SPAWAR TMs.**

**Generate TMCR**

A TMCR is a definitive, contractual document that tailors all specs, standards, or data items to produce a specific type of TM.

**Access a TMCR**

**ITP Request**

The Index of Technical Publications (ITP), for use by ships and shore activities, is a guide to identify TMs needed onboard a ship.

For Your Reference:

**ITP Can Save You Time**

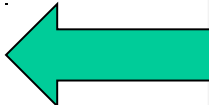

**TMMP**  
**S0005-AA-PRO-010**  
**Chap. 17: ITP**

**TMAR Request**

TM Analysis Requests are intended for Fleet Technical Support Centers and Integrated Logistics Overhaul Teams to identify TMs needed onboard a ship.

**TMO Request**

Use a TMO to request ship files for use by

ITP Request

The **Index of Technical Publications (ITP)** is a guide to identify publications needed onboard a ship. The ITP is *tailored to the configuration of a specific ship*. The ITP is produced from the Technical Data Management Information System (TDMIS), the Naval Sea Systems and Space and Naval Warfare Systems Command's automated technical manual (TM) management information system. TDMIS is operated and maintained by the Naval Systems Data Support Activity (NSDSA) of the Port Hueneme Division, Naval Surface Warfare Center, Port Hueneme, California.

The ITP is a computerized listing of ship, systems, equipment and general related NAVSEA/SPAWAR publications applicable to an individual ship. The ITP is derived from a comparison of a ship's configuration data from the Configuration Data Manager's Database-Open Architecture (CDMD-OA) and TDMIS TM data. The intended use of the ITP is to assist the ship in determining the publications needed to support the operation, maintenance, troubleshooting, and repair of the onboard systems/equipment. The ITP also provides information on non-equipment related items and procedures. The ITP has been designed to serve several purposes and will:

## NSDSA PORTAL

WELCOME TO THE NAVAL SYSTEMS DATA SUPPORT ACTIVITY:

THE NAVSEA AND SPAWAR CENTER OF EXCELLENCE FOR  
TECHNICAL MANUAL INFRASTRUCTURE/SUPPORT

Coming April 22 - 24: The Spring 2003 TMMA Conference. [See details...](#)

NSDSA is the NAVSEA and SPAWAR designated field activity responsible for the centralized management of technical manuals and technical services support of the NAVSEA Technical Manual Management Program.

TMMP is the foundation to NSDSA's products and services. It serves as a focused

collection of policies and procedures on which all technical manual activities are based. NSDSA TMMP products and services include:

- NAVSEA/SPAWAR TMMP Operations and Life Cycle Support Procedures
- TM Life Cycle Training
- Reference documents and forms

[Go to TMMP](#)

TDMIS is the TM life-cycle tracking system maintained by NSDSA and

used worldwide. Access to TDMIS provides NAVSEA, SPAWAR and NAVAIR with complete TM management functionalities. TDMIS products and services include:

- User Registration and Software Download
- User Training
- User Support
